WORK EXPERIENCE

Web Development Intern

League Inc, Sept-Dec 2022

- Work with my peers to implement REST API into the league system
- Took part in frequent code reviews for colleagues
- Created reusable and testable components using League's design system
- Maintained a high test coverage percentage with react testing library and jest
- Followed Agile methodology processes throughout the internship
- Took part in User Acceptance Testing of features that were worked on by the Journey Team
- Updated team's Storybook files with the new and updated CSF format, which improved overall developer storybook interactions.
- Added data analytics to features worked on throughout the term
- Enabled/empowered the data team by increasing analytics coverage for features worked on throughout the term
- Implemented assigned features with attention to accessibility and user experience

Administrative Coordinator

Juno College of Technology, Oct 2020 - Nov 2021

- Lead Tech-Talk preparation guiding students in best practices for stand-up presentation
- Detail-oriented data entry: transcript, grades, expense reports
- Manage and set up Slack channels and GitHub invitations
- Salesforce initiation of program folders and population of tracked content including the formula for expected/current sales
- Budgeting and Budget Tracking for all in-person gatherings
- Develop master docs for student tracking, course work, and grade tracking and link to master tracking using google sheets
- Create complete course packages including InDesign schedule, and digital distribution

EDUCATION

Lighthouse Labs, Web Development Bootcamp

2022

The University of Toronto, BFA (Honors Bachelor of Arts)

2012
